

- ☐ Learning progress metrics

## EPIC 6: Testing & Documentation

### TASK-022: Unit Tests

- ☐ All skills >80% coverage
- ☐ All agents >80% coverage
- ☐ Edge cases covered

### TASK-023: Integration Tests

- ☐ End-to-end agent workflows
- ☐ API endpoint tests
- ☐ Database transaction tests

### TASK-024: Documentation

- ☐ API documentation (OpenAPI)
- ☐ Skill usage examples
- ☐ Agent architecture diagrams
- ☐ User guides for segmentation

## Summary

This implementation plan uses Claude Agent SDK with:

- ✓ **Shared Skills** - Reusable across all agents
- ✓ **Human-in-the-Loop** - User feedback captured and applied
- ✓ **User-Defined Logic** - Segmentation criteria, scoring rules customizable
- ✓ **PostgreSQL JSONB** - Flexible schema, no migrations needed
- ✓ **Redis Vectors** - Semantic search capabilities
- ✓ **Clear Tasks** - Spec-driven development with testable units

**Ready for implementation!**
